Author Index

A

Abbott, W. *See* Bogardus, Lillioja, Mott, Zawadzki, Young, and Abbott.

Abboud, H. E. *See* Sedor and Abboud.

Abe, M. *See* Hayes, Sekine, Ohno, Abe, Keefe, and Kufe.

Abergel, R. P. *See* Oikarinen, Oikarinen, Tan, Abergel, Meeker, Chu, Prockop, and Uitto.

Abkowitz, J. L., Ott, R. L., Nakamura, J. M., Steinmann, L., Fialkow, P. J., and Adamson, J. W. Feline G-6-PD cellular mosaicism. Application to the study of retrovirus-induced pure red cell aplasia. 133.

Abrahamsson, L. *See* Rebuffé-Scrive, Enk, Crona, Lönnroth, Abrahamsson, Smith, and Björntorp.

Adamson, J. W. *See* Abkowitz, Ott, Nakamura, Steinmann, Fialkow, and Adamson.

—, *See* Raskind, Jacobson, Murphy, Adamson, and Fialkow.

Adelman, B. *See* Schafer and Adelman.

Adrogué, H. J., Chap, Z., Ishida, T., and Field, J. B. Role of the endocrine pancreas in the kalemic response to acute metabolic acidosis in conscious dogs. 798.

Agustines, M. *See* Hoskins, Agustines, McKee, Boulding, Kriaris, and Niedermeyer.

Ahluwalia, G. S. *See* Carney, Ahluwalia, Jayaram, Cooney, and Johns.

Ahmed, S. A. *See* Lucas, Ahmed, Casey, and MacDonald.

Aikawa, M. *See* Kazura, de Brito, Rabbege, and Aikawa.

Akazawa, S. *See* Buchanan, Freinkel, Lewis, Metzger, and Akazawa.

Akmal, M., Massry, S. G., Goldstein, D. A., Fanti, P., Weisz, A., and DeFronzo, R. A. Role of parathyroid hormone in the glucose intolerance of chronic renal failure. 1037.

Alaupovic, P. *See* Wang, McConathy, Kloer, and Alaupovic.

Al-Awqati, Q. *See* Schwartz and Al-Awqati.

Alexander, R. W. *See* Berk, Brock, Webb, Taubman, Atkinson, Gimbrone, and Alexander.

Allen, C. L. *See* Chapman, Allen, Stone, and Fair.

Almog, S. *See* Modan, Halkin, Almog, Lusky, Eshkol, Shefi, Shitrit, and Fuchs.

Ambrosino, D. M., Schiffman, G., Gotschlich, E. C., Schur, P. H., Rosenberg, G. A., DeLange, G. G., van Loghem, E., and Siber, G. R. Correlation between G2m(n) immunoglobulin allotype and human antibody response and susceptibility to polysaccharide encapsulated bacteria. 1935.

Ambrus, J. L., Jr., and Fauci, A. S. Human B lymphoma cell line producing B cell growth factor. 732.

Amherdt, M. *See* Patel, Pierzchala, Amherdt, and Orci.

Anagnou, N. P. *See* Noguchi, Dover, Rodgers, Serjeant, Antonarakis, Anagnou, Higgs, Weatherall, and Schechter.

Anderson, K. E. *See* Simionatto, Anderson, Drummond, and Kappas.

Andres, G. *See* Matsuo, Caldwell, Brentjens, and Andres.

Angel, A. *See* Fong, Rodrigues, Salter, Yip, Despres, Angel, and Gregg.

Antin, J. H. *See* Ginsburg, Antin, Smith, Orkin, and Rappeport.

Antonarakis, S. E. *See* Noguchi, Dover, Rodgers, Serjeant, Antonarakis, Anagnou, Higgs, Weatherall, and Schechter.

Arieff, A. I. *See* Fraser, Sarnacki, and Arieff.

Armstrong, N. *See* Danner, Armstrong, Heffelfinger, Sewell, Priest, and Elsas.

Arner, P. *See* Livingston, Einarsson, Backman, Ewerth, and Arner.

Ashmun, R. A. *See* Look, Peiper, Rebentisch, Ashmun, Roussel, Rettenmier, and Sherr.

Aster, R. H. *See* Christie, Mullen, and Aster.

Atkinson, P. M., Lampman, G. W., Furie, B. C., Naparstek, Y., Schwartz, R. S., Stollar, B. D., and Furie, B. Homology of the NH_2-terminal amino acid sequences of the heavy and light chains of human monoclonal lupus autoantibodies containing the dominant 16/6 idiotype. 1138.

Atkinson, W. J. *See* Berk, Brock, Webb, Taubman, Atkinson, Gimbrone, and Alexander.

Attie, M. F., Fallon, M. D., Spar, B., Wolf, J. S., Slatopolsky, E., and Goldfarb, S. Bone and parathyroid inhibitory effects of *S*-2(3-aminopropylamino)ethylphosphorothioic acid. Studies in experimental animals and cultured bone cells. 1191.

Aviv, A. *See* Lasker, Hopp, Grossman, Bamforth, and Aviv.

Aw, T. Y. *See* Ookhtens, Hobdy, Corvasce, Aw, and Kaplowitz.

Awad, S. *See* Donaldson, Harrison, Rosen, Bing, Kindness, Canar, Wagner, and Awad.

B

Babitsky, G. *See* Kleinberg, Niemann, Flamm, Cooper, Babitsky, and Valensi.

Bach, J.-F. *See* Jacob, Lety, Louvard, and Bach.

Backman, L. *See* Livingston, Einarsson, Backman, Ewerth, and Arner.

Bagby, G. C., Jr. *See* Zuckerman, Bagby, McCall, Sparks, Wells, Patel, and Goodrum.

Bajaj, S. P. *See* Usharani, Warn-Cramer, Kasper, and Bajaj.

Bakke, A. C. *See* Linker-Israeli, Bakke, Quismorio, and Horwitz.

Balconi, G. *See* Dejana, Languino, Polentarutti, Balconi, Ryckewaert, Larrieu, Donati, Mantovani, and Marguerie.

Baldassare, J. J., Kahn, R. A., Knipp, M. A., and Newman, P. J. Reconstitution of platelet proteins into phospholipid vesicles. Functional proteoliposomes. 35.

Ball, E. D. *See* Sabbath, Ball, Larcom, Davis, and Griffin.

Bamforth, R. *See* Lasker, Hopp, Grossman, Bamforth, and Aviv.

Banda, M. J., Clark, E. J., and Werb, Z. Regulation of alpha$_1$ proteinase inhibitor function by rabbit alveolar macrophages. Evidence for proteolytic rather than oxidative inactivation. 1758.

Banks-Schlegel, S. *See* Merlino, Xu, Richert, Clark, Ishii, Banks-Schlegel, and Pastan.

Baraona, E. *See* Karsenty, Baraona, Savolainen, and Lieber.

Barnard, J. A., Ghishan, F. K., and Wilson, F. A. Ontogenesis of taurocholate transport by rat ileal brush border membrane vesicles. 869.

Barrett, E. J. *See* Schwartz, Barrett, Francis, Jacob, and Zaret.

Batlle, D. C., Downer, M., Gutterman, C., and Kurtzman, N. A. Relationship of urinary and blood carbon dioxide tension during hypercapnia in the rat. Its significance in the evaluation of collecting duct hydrogen ion secretion. 1517.

Beall, G. N., Rapoport, B., Chopra, I. J., and Kruger, S. R. Rabbits immunized with thyroid-stimulating hormone produce autoanti-idiotypic thyroid-stimulating antibodies. 1435.

Beardsley, G. P. *See* Letvin, Linch, Beardsley, McIntyre, Miller, and Nathan.

Beaudoin, D. *See* LeBoff, Shoback, Brown, Thatcher, Leombruno, Beaudoin, Henry, Wilson, Pallotta, Marynick, Stock, and Leight.

Becker, L. C. *See* Ciuffo, Ouyang, Becker, Levin, and Weisfeldt.

Beck-Schroeder, S. *See* Mamus, Beck-Schroeder, and Zanjani.

Beglinger, C., Fried, M., Whitehouse, I., Jansen, J. B., Lamers, C. B., and Gyr, K. Pancreatic enzyme response to a liquid meal and to hormonal stimulation. Correlation with plasma secretin and cholecystokinin levels. 1471.

Beischel, L. *See* Waldo, Forristal, Beischel, and West.

Belch, A. *See* Minden, Messner, and Belch.

Bell, L., Maratea, E., and Rutlen, D. L. Influence of naloxone on the total capacitance vasculature of the dog. 1894.

Bello-Reuss, E. *See* Campbell, Bello-Reuss, and Klahr.

Bens, M. *See* Schambelan, Blake, Sraer, Bens, Nivez, and Wahbe.

Bensch, K. G. *See* Weber, Zuckerman, Bostwick, Bensch, Sikic, and Raffin.

Benson, M. D., and Dwulet, F. E. Identification of carriers of a variant plasma prealbumin (transthyretin) associated with familial amyloidotic polyneuropathy type I. 71.

Bensussan, A. *See* Hercend, Griffin, Bensussan, Schmidt, Edson, Brennan, Murray, Daley, Schlossman, and Ritz.

Bergenstal, R. M. *See* Chang, Bergenstal, and Field.

Berger, N. A., Berger, S. J., Catino, D. M., Petzold, S. J., and Robins, R. K. Modulation of nicotinamide adenine dinucleotide and poly(adenosine diphosphoribose) metabolism by the synthetic "C" nucleoside analogs, tiazofurin and selenazofurin. A new strategy for cancer chemotherapy. 702.

Berger, S. J. *See* Berger, Berger, Catino, Petzold, and Robins.
Berk, B. C., Brock, T. A., Webb, R. C., Taubman, M. B., Atkinson, W. J., Gimbrone, Jr., M. A., and Alexander, R. W. Epidermal growth factor, a vascular smooth muscle mitogen, induces rat aortic contraction. 1083.
Berk, M. A., Clutter, W. E., Skor, D., Shah, S. D., Gingerich, R. P., Parvin, C. A., and Cryer, P. E. Enhanced glycemic responsiveness to epinephrine in insulin-dependent diabetes mellitus is the result of the inability to secrete insulin. Augmented insulin secretion normally limits the glycemic, but not the lipolytic or ketogenic, response to epinephrine in humans. 1842.
Berk, P. D. *See* Stremmel, Lotz, Strohmeyer, and Berk.
Berkovitz, G. D., Guerami, A., Brown, T. R., MacDonald, P. C., and Migeon, C. J. Familial gynecomastia with increased extraglandular aromatization of plasma carbon$_{19}$-steroids. 1763.
Bernal, S. D. *See* Mabry, Speak, Griffin, Stahel, and Bernal.
Bernar, J. *See* Bernardini, Rizzo, Dalakas, Bernar, and Gahl.
Bernardini, I., Rizzo, W. B., Dalakas, M., Bernar, J., and Gahl, W. A. Plasma and muscle free carnitine deficiency due to renal Fanconi syndrome. 1124.
Bernier, J.-J. *See* Florent, Flourie, Leblond, Rautureau, Bernier, and Rambaud.
Bertani, T. *See* Remuzzi, Imberti, Rossini, Morelli, Carminati, Cattaneo, and Bertani.
Besmond, C. *See* Munnich, Besmond, Darquy, Reach, Vaulont, Dreyfus, and Kahn.
Bettelheim, P. *See* Smolen, Bettelheim, Köller, McDougal, Graninger, Luger, Knapp, and Lechner.
Bevers, E. M. *See* Franck, Bevers, Lubin, Comfurius, Chiu, Op den Kamp, Zwaal, van Deenen, and Roelofsen.
Bikle, D. D., Gee, E., Halloran, B., and Haddad, J. G. Correction. 1393.
Bing, D. H. *See* Donaldson, Harrison, Rosen, Bing, Kindness, Canar, Wagner, and Awad.
Bishop, L. R. *See* Tsang, Fudenberg, Galbraith, Donnelly, Bishop, and Koopmann.
Björkhem, I. *See* Kase, Björkhem, Hågå, and Pedersen.
—, *See* Skrede, Björkhem, Buchmann, Hopen, and Fausa.
Bjornsson, T. D. *See* Hanson, Harker, and Bjornsson.
Björntorp, P. *See* Rebuffé-Scrive, Enk, Crona, Lönnroth, Abrahamsson, Smith, and Björntorp.
Blachley, J. D. *See* Knochel, Blachley, Johnson, and Carter.
Blake, S. *See* Schambelan, Blake, Sraer, Bens, Nivez, and Wahbe.
Block, L. H., Jaksche, H., Erne, P., Bolli, P., and Bühler, F. R. (−)-Adrenaline-induced, calcium-dependent phosphorylation of proteins in human platelets. 1600.
Boerth, L. W. *See* Pennington, Rossing, Boerth, and Lee.
Bogardus, C., Lillioja, S., Mott, D., Zawadzki, J., Young, A., and Abbott, W. Evidence for reduced thermic effect of insulin and glucose infusions in Pima Indians. 1264.
—, *See* Lillioja, Bogardus, Mott, Kennedy, Knowler, and Howard.
Bo-Linn, G. W., Vendrell, D. D., Lee, E., and Fordtran, J. S. An evaluation of the significance of microscopic colitis in patients with chronic diarrhea. 1559.
Bolli, G., De Feo, P., Perriello, G., De Cosmo, S., Ventura, M., Campbell, P., Brunetti, P., and Gerich, J. E. Role of hepatic autoregulation in defense against hypoglycemia in humans. 1623.
Bolli, P. *See* Block, Jaksche, Erne, Bolli, and Bühler.
Booth, B. E., Tsai, H. C., and Morris, R. C., Jr. Vitamin D status regulates 25-hydroxyvitamin D$_3$-1α-hydroxylase and its responsiveness to parathyroid hormone in the chick. 155.
Booth, J. D. *See* Schulte, Chrousos, Gold, Booth, Oldfield, Cutler, and Loriaux.
Borden, E. C. *See* Edwards, Merritt, Fuhlbrigge, and Borden.
Boreisha, I. *See* Toki, Sumi, Sasaki, Boreisha, and Robbins.
Borysko, K. *See* Thoene, Lemons, Boskovich, and Borysko.
Boskovich, S. *See* Thoene, Lemons, Boskovich, and Borysko.
Bostwick, D. G. *See* Weber, Zuckerman, Bostwick, Bensch, Sikic, and Raffin.
Bouchard, T. J., Jr. *See* Kohler, Rivera, Eckert, Bouchard, and Heston.
Bouhnik, J. *See* Campbell, Bouhnik, Coezy, Menard, and Corvol.
Boulding, E. T. *See* Hoskins, Agustines, McKee, Boulding, Kriaris, and Niedermeyer.
Boyd, A. E., III *See* Nelson and Boyd.
Boyer, J. L. *See* Meier, Knickelbein, Moseley, Dobbins, and Boyer.
Bozzo, C. *See* Cavallo-Perin, Cassader, Bozzo, Bruno, Nuccio, Dall'Omo, Marucci, and Pagano.
Branch, W. J. *See* Pomare, Branch, and Cummings.
Brasitus, T. A. *See* Magun, Brasitus, and Glickman.
Braunwald, E. *See* Jaski, Fifer, Wright, Braunwald, and Colucci.
Breitkreutz, L. *See* Griffith, Breitkreutz, Trapp, Briet, Noyes, Lundblad, and Roberts.
Brennan, A. *See* Hercend, Griffin, Bensussan, Schmidt, Edson, Brennan, Murray, Daley, Schlossman, and Ritz.
Brentjens, J. R. *See* Matsuo, Caldwell, Brentjens, and Andres.
Briet, E. *See* Griffith, Breitkreutz, Trapp, Briet, Noyes, Lundblad, and Roberts.
Brock, T. A. *See* Berk, Brock, Webb, Taubman, Atkinson, Gimbrone, and Alexander.
Bross, K. J. *See* Fauser, Kanz, Bross, and Löhr.
Brower, M. S., Levin, R. I., and Garry, K. Human neutrophil elastase modulates platelet function by limited proteolysis of membrane glycoproteins. 657.
Brown, E. M. *See* LeBoff, Shoback, Brown, Thatcher, Leombruno, Beaudoin, Henry, Wilson, Pallotta, Marynick, Stock, and Leight.
Brown, M. R. *See* Lenz, Hester, and Brown.
Brown, T. R. *See* Berkovitz, Guerami, Brown, MacDonald, and Migeon.
Brown, W. V. *See* Rubinstein, Gibson, Paterniti, Kakis, Little, Ginsberg, and Brown.
Brugnara, C., Kopin, A. S., Bunn, H. F., and Tosteson, D. C. Regulation of cation content and cell volume in erythrocytes from patients with homozygous hemoglobin C disease. 1608.
Brunetti, P. *See* Bolli, De Feo, Perriello, De Cosmo, Ventura, Campbell, Brunetti, and Gerich.
Bruno, A. *See* Cavallo-Perin, Cassader, Bozzo, Bruno, Nuccio, Dall'Omo, Marucci, and Pagano.
Bruno, E. *See* Hoffman, Yang, Bruno, and Straneva.
Buchanan, T., Freinkel, N., Lewis, N. J., Metzger, B. E., and Akazawa, S. Fuel-mediated teratogenesis. Use of D-mannose to modify organogenesis in the rat embryo in vivo. 1927.
Buchmann, M. S. *See* Skrede, Björkhem, Buchmann, Hopen, and Fausa.
Buerkert, J. *See* Hamm, Trigg, Martin, Gillespie, and Buerkert.
Bühler, F. R. *See* Block, Jaksche, Erne, Bolli, and Bühler.
Buja, L. M. *See* Chien, Sen, Reynolds, Chang, Kim, Gunn, Buja, and Willerson.
Bunn, H. F. *See* Brugnara, Kopin, Bunn, and Tosteson.
Burge, J. *See* Taylor, Horgan, Hooper, and Burge.
Buzney, S. *See* King, Goodman, Buzney, Moses, and Kahn.

C

Caflisch, C. R. *See* DuBose and Caflisch.
Caldwell, P. R. B. *See* Matsuo, Caldwell, Brentjens, and Andres.
Calvario, G. C. *See* Ervin, Leake, Ross, Calvario, and Fisher.
Campbell, A., Wicha, M. S., and Long, M. Extracellular matrix promotes the growth and differentiation of murine hematopoietic cells in vitro. 2085.

Contents

The Journal of Clinical Investigation
January 1985, Volume 75, Number 1

Perspectives

The acquired immunodeficiency syndrome (AIDS). *F. S. Rosen* 1

Regular Articles

Characterization of the clotting activities of structurally different forms of activated Factor IX. Enzymatic properties of normal human Factor IXaα, Factor IXaβ, and activated Factor $IX_{Chapel\ Hill}$. *M. J. Griffith, L. Breitkreutz, H. Trapp, E. Briet, C. M. Noyes, R. L. Lundblad, and H. R. Roberts* 4

Interaction between fibrinogen and cultured endothelial cells. Induction of migration and specific binding. *E. Dejana, L. R. Languino, N. Polentarutti, G. Balconi, J. J. Ryckewaert, M. J. Larrieu, M. B. Donati, A. Mantovani, and G. Marguerie* 11

Asialo von Willebrand factor interactions with platelets. Interdependence of glycoproteins Ib and IIb/IIIa for binding and aggregation. *H. R. Gralnick, S. B. Williams, and B. S. Coller* 19

Immunoglobulins in the hyperimmunoglobulin E and recurrent infection (Job's) syndrome. Deficiency of anti-*Staphylococcus aureus* immunoglobulin A. *S. C. Dreskin, P. K. Goldsmith, and J. I. Gallin* 26

Reconstitution of platelet proteins into phospholipid vesicles. Functional proteoliposomes. *J. J. Baldassare, R. A. Kahn, M. A. Knipp, and P. J. Newman* 35

Biochemical and neuropsychological effects of elevated plasma phenylalanine in patients with treated phenylketonuria. A model for the study of phenylalanine and brain function in man. *W. Krause, M. Halminski, L. McDonald, P. Dembure, R. Salvo, D. Freides, and L. Elsas* 40

Regulation of parathyroid hormone release and cytosolic calcium by extracellular calcium in dispersed and cultured bovine and pathological human parathyroid cells. *M. S. LeBoff, D. Shoback, E. M. Brown, J. Thatcher, R. Leombruno, D. Beaudoin, M. Henry, R. Wilson, J. Pallotta, S. Marynick, J. Stock, and G. Leight* 49

Characterization of iron-mediated peroxidative injury in isolated hepatic lysosomes. *I. T. Mak and W. B. Weglicki* 58

Locus assignment of α-globin structural mutations by hybrid-selected translation. *S. A. Liebhaber and F. E. Cash* 64

Identification of carriers of a variant plasma prealbumin (transthyretin) associated with familial amyloidotic polyneuropathy type I. *M. D. Benson and F. E. Dwulet* 71

Characterization of three abnormal Factor IX variants (Bm Lake Elsinore, Long Beach, and Los Angeles) of hemophilia-B. Evidence for defects affecting the latent catalytic site. *P. Usharani, B. J. Warn-Cramer, C. K. Kasper, and S. P. Bajaj* 76

Coronary thrombolysis and infarct size reduction after intravenous infusion of recombinant tissue-type plasminogen activator in nonhuman primates. *W. Flameng, F. Van de Werf, J. Vanhaecke, M. Verstraete, and D. Collen* 84

Origin of leukemic relapse after bone marrow transplantation detected by restriction fragment length polymorphism. *M. D. Minden, H. A. Messner, and A. Belch* 91

Increased glomerular thromboxane synthesis as a possible cause of proteinuria in experimental nephrosis. *G. Remuzzi, L. Imberti, M. Rossini, C. Morelli, C. Carminati, G. M. Cattaneo, and T. Bertani* 94

Dynamics of interaction between complement-fixing antibody/dsDNA immune complexes and erythrocytes. In vitro studies and potential general applications to clinical immune complex testing. *R. P. Taylor, C. Horgan, M. Hooper, and J. Burge* 102

Regional distribution and alterations of lectin binding to colorectal mucin in mucosal biopsies from controls and subjects with inflammatory bowel disease. *L. R. Jacobs and P. W. Huber* 112

Antineutrophil autoantibodies in Graves' disease. Implications of thyrotropin binding to neutrophils. *S. A. Weitzman, T. P. Stossel, D. C. Harmon, G. Daniels, F. Maloof, and E. C. Ridgway* 119

Variability in purified dysfunctional $C\bar{1}$-inhibitor proteins from patients with hereditary angioneurotic edema. Functional and analytical gel studies. *V. H. Donaldson, R. A. Harrison, F. S. Rosen, D. H. Bing, G. Kindness, J. Canar, C. J. Wagner, and S. Awad* 124

Feline glucose-6-phosphate dehydrogenase cellular mosaicism. Application to the study of retrovirus-induced pure red cell aplasia. *J. L. Abkowitz, R. L. Ott, J. M. Nakamura, L. Steinmann, P. J. Fialkow, and J. W. Adamson* 133

Effect of uracil arabinoside on metabolism and cytotoxicity of cytosine arabinoside in L5178Y murine leukemia. *J.-L. Yang, E. H. Cheng, R. L. Capizzi, Y.-C. Cheng, and T. Kute* 141

Stereospecific transport of triiodothyronine from plasma to cytosol and from cytosol to nucleus in rat liver, kidney, brain, and heart. *J. H. Oppenheimer and H. L. Schwartz* 147

Vitamin D status regulates 25-hydroxyvitamin D_3-1α-hydroxylase and its responsiveness to parathyroid hormone in the chick. *B. E. Booth, H. C. Tsai, and R. C. Morris, Jr.* 155

Effect of estradiol and steroid analogues on the clearance of immunoglobulin G-coated erythrocytes. *D. Friedman, F. Nettl, and A. D. Schreiber* 162

Serum prostacyclin binding defects in thrombotic thrombocytopenic purpura. *K. K. Wu, E. R. Hall, E. C. Rossi, and A. C. Papp* 168

Relationships between the cytotoxicity of tiazofurin and its metabolism by cultured human lung cancer cells. *D. N. Carney, G. S. Ahluwalia, H. N. Jayaram, D. A. Cooney, and D. G. Johns* 175

Uncoupling of the membrane skeleton from the lipid bilayer. The cause of accelerated phospolipid flip-flop leading to an enhanced procoagulant activity of sickled cells. *P. F. H. Franck, E. M. Bevers, B. H. Lubin, P. Comfurius, D. T.-Y. Chiu, J. A. F. Op den Kamp, R. F. A. Zwaal, L. L. M. van Deenen, and B. Roelofsen* 183

Human monocyte-derived mucus secretagogue. *Z. Marom, J. H. Shelhamer, and M. Kaliner* 191

Regulation of lipoprotein lipase in primary cultures of isolated human adipocytes. *P. A. Kern, S. Marshall, and R. H. Eckel* 199

Isolation of high density lipoproteins from rat intestinal epithelial cells. *A. M. Magun, T. A. Brasitus, and R. M. Glickman* 209

Hydraulic water permeability and transepithelial voltage in the isolated perfused rabbit cortical collecting tubule following acute unilateral ureteral obstruction. *H. T. Campbell, E. Bello-Reuss, and S. Klahr* 219

Evolution of recurrent herpes simplex lesions. An immunohistologic study. *A. L. Cunningham, R. R. Turner, A. C. Miller, M. F. Para, and T. C. Merigan* 226

Abnormalities of myeloid progenitor cells after "successful" bone marrow transplantation. *S. Li, R. Champlin, J. H. Fitchen, and R. P. Gale* 234

Platelet $C\bar{1}$ inhibitor. A secreted alpha-granule protein. *A. H. Schmaier, P. M. Smith, and R. W. Colman* 242

Hyperuricemia in glycogen storage disease type I. Contributions by hypoglycemia and hyperglucagonemia to increased urate production. *J. L. Cohen, A. Vinik, J. Faller, and I. H. Fox* 251

Sinusoidal efflux of glutathione in the perfused rat liver. Evidence for a carrier-mediated process. *M. Ookhtens, K. Hobdy, M. C. Corvasce, T. Y. Aw, and N. Kaplowitz* 258

Molecular defect in the sickle erythrocyte skeleton. Abnormal spectrin binding to sickle inside-out vesicles. *O. S. Platt, J. F. Falcone, and S. E. Lux* 266

Interaction of antithrombin III with bovine aortic segments. Role of heparin in binding and enhanced anticoagulant activity. *D. Stern, P. Nawroth, J. Marcum, D. Handley, W. Kisiel, R. Rosenberg, and K. Stern* 272

Comparison of hepatic elimination of different forms of cholecystokinin in dogs. Bioassay and radioimmunoassay comparisons of cholecystokinin-8-sulfate and -33-sulfate. *T. Sakamoto, M. Fujimura, J. Newman, X.-G. Zhu, G. H. Greeley, Jr., and J. C. Thompson* 280

Platelet-induced neurogenic coronary contractions due to accumulation of the false neurotransmitter, 5-hydroxytryptamine. *R. A. Cohen* 286

Enhanced alveolar macrophage-mediated antigen-induced T lymphocyte proliferation in sarcoidosis. *A. Venet, A. J. Hance, C. Saltini, B. W. S. Robinson, and R. G. Crystal* 293

Rapid Publications

Sn-protoporphyrin rapidly and markedly enhances the heme saturation of hepatic tryptophan pyrrolase. Evidence that this synthetic metalloporphryin increases the functional content of heme in the liver. *A. Kappas, G. S. Drummond, and M. K. Sardana* 302

Gastrin-releasing peptide is a selective mitogen for small cell lung carcinoma in vitro. *S. Weber, J. E. Zuckerman, D. G. Bostwick, K. G. Bensch, B. I. Sikic, and T. A. Raffin* 306

Fab-mediated binding of drug-dependent antibodies to platelets in quinidine- and quinine-induced thrombocytopenia. *D. J. Christie, P. C. Mullen, and R. H. Aster* 310

Binding of a monoclonal anti-DNA autoantibody to identical protein(s) present at the surface of several human cell types involved in lupus pathogenesis. *L. Jacob, M.-A. Lety, D. Louvard, and J.-F. Bach* 315

January Author Index 320

Contents

The Journal of Clinical Investigation
February 1985, Volume 75, Number 2

Perspectives

Origins of anti-DNA autoantibodies. *R. S. Schwartz and B. D. Stollar* 321

Regular Articles

Functionally thrombasthenic state in normal platelets following the administration of ticlopidine. *G. Di Minno, A. M. Cerbone, P. L. Mattioli, S. Turco, C. Iovine, and M. Mancini* 328

Biosynthesis of Factor V in isolated guinea pig megakaryocytes. *H. C. Chiu, P. K. Schick, and R. W. Colman* 339

Molecular basis of *Escherichia coli* colonization of the upper urinary tract in BALB/c mice. Gal-Gal pili immunization prevents *Escherichia coli* pyelonephritis in the BALB/c mouse model of human pyelonephritis. *P. O'Hanley, D. Lark, S. Falkow, and G. Schoolnik* 347

Roles of apolipoproteins B and E in the cellular binding of very low density lipoproteins. *E. S. Krul, M. J. Tikkanen, T. G. Cole, J. M. Davie, and G. Schonfeld* 361

Inhibitors of protein synthesis also inhibit lysosomal proteolysis. Studies using cystinotic fibroblasts. *J. G. Thoene, R. Lemons, S. Boskovich, and K. Borysko* 370

Mechanism of deoxyadenosine and 2-chlorodeoxyadenosine toxicity to nondividing human lymphocytes. *S. Seto, C. J. Carrera, M. Kubota, D. B. Wasson, and D. A. Carson* 377

Modulation of lipoprotein lipase activity by apolipoproteins. Effect of apolipoprotein C-III. *C.-S. Wang, W. J. McConathy, H. U. Kloer, and P. Alaupovic* 384

Characterization and partial purification of a factor from uremic human serum that induces insulin resistance. *M. L. McCaleb, M. S. Izzo, and D. H. Lockwood* 391

Glucagon receptor of human liver. Studies of its molecular weight and binding properties, and its ability to activate hepatic adenylyl cyclase of non-obese and obese subjects. *J. N. Livingston, K. Einarsson, L. Backman, S. Ewerth, and P. Arner* 397

Increased prostaglandin production by glomeruli isolated from rats with streptozotocin-induced diabetes mellitus. *M. Schambelan, S. Blake, J. Sraer, M. Bens, M.-P. Nivez, and F. Wahbe* 404

A nonantigenic covalent streptokinase–polyethylene glycol complex with plasminogen activator function. *S. Rajagopalan, S. L. Gonias, and S. V. Pizzo* 413

Adrenergically mediated intrapancreatic control of the glucagon response to glucopenia in the isolated rat pancreas. *A. Hisatomi, H. Maruyama, L. Orci, M. Vasko, and R. H. Unger* 420

Defective peroxisomal cleavage of the C_{27}-steroid side chain in the cerebro-hepato-renal syndrome of Zellweger. *B. F. Kase, I. Björkhem, P. Hågå, and J. I. Pedersen* 427

Functional compartmentation of glycolytic versus oxidative metabolism in isolated rabbit heart. *J. Weiss and B. Hiltbrand* 436

A novel pathway for biosynthesis of cholestanol with 7α-hydroxylated C_{27}-steroids as intermediates, and its importance for the accumulation of cholestanol in cerebrotendinous xanthomatosis. *S. Skrede, I. Björkhem, M. S. Buchmann, G. Hopen, and O. Fausa* 448

Plasmin inhibition of platelet function and of arachidonic acid metabolism. *A. I. Schafer and B. Adelman* 456

Vasoactive intestinal polypeptide-induced chloride secretion by a colonic epithelial cell line. Direct participation of a basolaterally localized Na^+,K^+,Cl^- cotransport system. *K. Dharmsathaphorn, K. G. Mandel, H. Masui, and J. A. McRoberts* 462

Role of the thymus in induction and transfer of vaccination against adjuvant arthritis with a T lymphocyte line in rats. *J. Holoshitz, A. Matitiau, and I. R. Cohen* 472

Transport of ammonia in the rabbit cortical collecting tubule. *L. L. Hamm, D. Trigg, D. Martin, C. Gillespie, and J. Buerkert* 478

Studies of human C5a as a mediator of inflammation in normal human skin. *K. B. Yancey, C. H. Hammer, L. Harvath, L. Renfer, M. M. Frank, and T. J. Lawley* . . . 486

Modulation of heparin cofactor II activity by histidine-rich glycoprotein and platelet factor 4. *D. M. Tollefsen and C. A. Pestka* 496

Structural and functional evolution of jejunal allograft rejection in rats and the ameliorating effects of cyclosporine therapy. *J. L. Madara and R. L. Kirkman* 502

Studies on the mechanism of Sn-protoporphyrin suppression of hyperbilirubinemia. Inhibition of heme oxidation and bilirubin production. *C. S. Simionatto, K. E. Anderson, G. S. Drummond, and A. Kappas* 513

Sensitization to epithelial antigens in chronic mucosal inflammatory disease. Characterization of human intestinal mucosa-derived mononuclear cells reactive with purified epithelial cell-associated components in vitro. *J. K. Roche, C. Fiocchi, and K. Youngman* 522

Role of Factor VIII-von Willebrand factor and fibronectin in the interaction of platelets in flowing blood with monomeric and fibrillar human collagen types I and III. *W. P. M. Houdijk, K. S. Sakariassen, P. F. E. M. Nievelstein, and J. J. Sixma* 531

Presence of the Tn antigen on hematopoietic progenitors from patients with the Tn syndrome. *W. Vainchenker, G. Vinci, U. Testa, A. Henri, A. Tabilio, M.-P. Fache, H. Rochant, and J.-P. Cartron* 541

5-Azacytidine acts directly on both erythroid precursors and progenitors to increase production of fetal hemoglobin. *R. K. Humphries, G. Dover, N. S. Young, J. G. Moore, S. Charache, T. Ley, and A. W. Nienhuis* 547

Dietary protein suppresses feedback control of glomerular filtration in rats. *F. D. Seney, Jr. and F. S. Wright* 558

Transfer and expression of the gene encoding a human myeloid membrane antigen (gp150). *A. T. Look, S. C. Peiper, M. B. Rebentisch, R. A. Ashmun, M. F. Roussel, C. W. Rettenmier, and C. J. Sherr* 569

Autoimmune sera reactive with Sm antigen contain high levels of RNP-like antibodies. *W. H. Reeves, D. E. Fisher, R. G. Lahita, and H. G. Kunkel* 580

An in vivo microperfusion study of distal tubule bicarbonate reabsorption in normal and ammonium chloride rats. *D. Z. Levine* 588

Origin of cell populations after bone marrow transplantation. Analysis using DNA sequence polymorphisms. *D. Ginsburg, J. H. Antin, B. R. Smith, S. H. Orkin, and J. M. Rappeport* 596

Bile acid synthesis during development. Mitochondrial 12α-hydroxylation in human fetal liver. *J. Gustafsson* 604

Influence of chronic lactulose ingestion on the colonic metabolism of lactulose in man (an in vivo study). *C. Florent, B. Flourie, A. Leblond, M. Rautureau, J.-J. Bernier, and J.-C. Rambaud* 608

Regulation of the production and catabolism of plasma low density lipoproteins in hypertriglyceridemic subjects. Effect of weight loss. *H. N. Ginsberg, N.-A. Le, and J. C. Gibson* 614

Human macrophage activation. Modulation of mannosyl, fucosyl receptor activity in vitro by lymphokines, gamma and alpha interferons, and dexamethasone. *T. Mokoena and S. Gordon* 624

Cytosine arabinoside transport and metabolism in acute leukemias and T cell lymphoblastic lymphoma. *J. S. Wiley, J. Taupin, G. P. Jamieson, M. Snook, W. H. Sawyer, and L. R. Finch* 632

Positive inotropic and vasodilator actions of milrinone in patients with severe congestive heart failure. Dose-response relationships and comparison to nitroprusside. *B. E. Jaski, M. A. Fifer, R. F. Wright, E. Braunwald, and W. S. Colucci* 643

Immunoregulatory T cells in man. Histamine-induced suppressor T cells are derived from a Leu 2+ (T8+) subpopulation distinct from that which gives rise to cytotoxic T cells. *P. Sansoni, E. D. Silverman, M. M. Khan, K. L. Melmon, and E. G. Engleman* 650

Human neutrophil elastase modulates platelet function by limited proteolysis of membrane glycoproteins. *M. S. Brower, R. I. Levin, and K. Garry* 657

Presence of lipid hydroperoxide in human plasma. *M. A. Warso and W. E. M. Lands* 667

Demonstration of elastin gene expression in human skin fibroblast cultures and reduced tropoelastin production by cells from a patient with atrophoderma. *M. G. Giro, A. I. Oikarinen, H. Oikarinen, G. Sephel, J. Uitto, and J. M. Davidson* 672

Comparative study of pituitary–thyroid hormone economy in fasting and hypothyroid rats. *D. L. St. Germain and V. A. Galton* 679

Effect of the long-term administration of corticotropin-releasing factor on the pituitary-adrenal and pituitary-gonadal axis in the male rat. *C. Rivier and W. Vale* . . . 689

A new hemoglobin variant, hemoglobin Nunobiki [α141 (HC3) Arg → Cys]. Notable influence of the carboxy-terminal cysteine upon various physico-chemical characteristics of hemoglobin. *S. Shimasaki* 695

Modulation of nicotinamide adenine dinucleotide and poly(adenosine diphosphoribose) metabolism by the synthetic "C" nucleoside analogs, tiazofurin and selenazofurin. A new strategy for cancer chemotherapy. *N. A. Berger, S. J. Berger, D. M. Catino, S. J. Petzold, and R. K. Robins* 702

Effect of heparin-induced lipolysis on the distribution of apolipoprotein E among lipoprotein subclasses. Studies with patients deficient in hepatic triglyceride lipase and lipoprotein lipase. *A. Rubinstein, J. C. Gibson, J. R. Paterniti, Jr., G. Kakis, A. Little, H. N. Ginsberg, and W. V. Brown* 710

A monokine stimulates production of human erythroid burst-promoting activity by endothelial cells in vitro. *K. S. Zuckerman, G. C. Bagby, Jr., E. McCall, B. Sparks, J. Wells, V. Patel, and D. Goodrum* 722

Estrogens and antiestrogens stimulate release of bone resorbing activity by cultured human breast cancer cells. *A. Valentin-Opran, G. Eilon, S. Saez, and G. R. Mundy* 726

Human B lymphoma cell line producing B cell growth factor. *J. L. Ambrus, Jr. and A. S. Fauci* 732

Muscle cell electrical hyperpolarization and reduced exercise hyperkalemia in physically conditioned dogs. *J. P. Knochel, J. D. Blachley, J. H. Johnson, and N. W. Carter* 740

Heterogeneity of clonogenic cells in acute myeloblastic leukemia. *K. D. Sabbath, E. D. Ball, P. Larcom, R. B. Davis, and J. D. Griffin* 746

Effects of in vitro corticosteroids on B cell activation, proliferation, and differentiation. *T. R. Cupps, T. L. Gerrard, R. J. M. Falkoff, G. Whalen, and A. S. Fauci* 754

Correction of interleukin-2 production in patients with systemic lupus erythematosus by removal of spontaneously activated suppressor cells. *M. Linker-Israeli, A. C. Bakke, F. P. Quismorio, Jr., and D. A. Horwitz* 762

Rapid Publication

Renal mechanism of action of rat atrial natriuretic factor. *C.-L. Huang, J. Lewicki, L. K. Johnson, and M. G. Cogan* 769

Maintenance of antigen specificity by human interleukin-2-dependent T cell lines. Use of antigen-presenting cells and OKT3 antibody in the absence of antigen. *S. J. Padula, M. K. Pollard, E. G. Lingenheld, and R. B. Clark* 788

Role of the endocrine pancreas in the kalemic response to acute metabolic acidosis in conscious dogs. *H. J. Adrogué, Z. Chap, T. Ishida, and J. B. Field* 798

Hyperinsulinemia. A link between hypertension obesity and glucose intolerance. *M. Modan, H. Halkin, S. Almog, A. Lusky, A. Eshkol, M. Shefi, A. Shitrit, and Z. Fuchs* 809

Generation in plasma of a fast-acting inhibitor of plasminogen activator in response to endotoxin stimulation. *M. Colucci, J. A. Paramo, and D. Collen* 818

Structural heterogeneity of the axonemes of respiratory cilia and sperm flagella in normal men. *L. J. Wilton, H. Teichtahl, P. D. Temple-Smith, and D. M. de Kretser* 825

N-Acetyl endorphin in rat spermatogonia and primary spermatocytes. *M. C. Cheng, J. A. Clements, A. I. Smith, S. J. Lolait, and J. W. Funder* 832

Functional and phenotypic studies of Japanese adult T cell leukemia cells. *C. Morimoto, T. Matsuyama, C. Oshige, H. Tanaka, T. Hercend, E. L. Reinherz, and S. F. Schlossman* 836

Regulation of ammonia production by mouse proximal tubules perfused in vitro. Effect of luminal perfusion. *G. T. Nagami and K. Kurokawa* 844

Mechanics of intercostal space and actions of external and internal intercostal muscles. *A. De Troyer, S. Kelly, P. T. Macklem, and W. A. Zin* 850

Absence of branched chain acyl-transferase as a cause of maple syrup urine disease. *D. J. Danner, N. Armstrong, S. C. Heffelfinger, E. T. Sewell, J. H. Priest, and L. J. Elsas* 858

Monocyte procoagulant activity in glomerulonephritis associated with systemic lupus erythematosus. *E. H. Cole, J. Schulman, M. Urowitz, E. Keystone, C. Williams, and G. A. Levy* 861

Ontogenesis of taurocholate transport by rat ileal brush border membrane vesicles. *J. A. Barnard, F. K. Ghishan, and F. A. Wilson* 869

Effects of postprandial lipemia on plasma cholesterol metabolism. *G. R. Castro and C. J. Fielding* 874

Genetic regulation of immunoglobulin and specific antibody levels in twins reared apart. *P. F. Kohler, V. J. Rivera, E. D. Eckert, T. J. Bouchard, Jr., and L. L. Heston* 883

Corticotropin-releasing factor. Mechanisms to inhibit gastric acid secretion in conscious dogs. *H. J. Lenz, S. E. Hester, and M. R. Brown* 889

A monoclonal antibody to human platelet glycoprotein IIIa detects a related protein in cultured human endothelial cells. *P. Thiagarajan, S. S. Shapiro, E. Levine, L. DeMarco, and A. Yalcin* 896

Additive effect of intravascular complement activation and brief episodes of hypoxia in producing increased permeability in the rabbit lung. *G. L. Larsen, R. O. Webster, G. S. Worthen, R. S. Gumbay, and P. M. Henson* 902

Increased angiotensin-converting enzyme in peripheral blood monocytes from patients with sarcoidosis. *T. Okabe, K. Yamagata, M. Fujisawa, J. Watanabe, F. Takaku, J. J. Lanzillo, and B. L. Fanburg* 911

Cytochrome *b* deficiency in an autosomal form of chronic granulomatous disease. A third form of chronic granulomatous disease recognized by monocyte hybridization. *R. S. Weening, L. Corbeel, M. de Boer, R. Lutter, R. van Zwieten, M. N. Hamers, and D. Roos* 915

Roles of Ca^{2+} and Na^+ on the modulation of antidiuretic hormone action on urea permeability in toad urinary bladder. *M. A. Hardy and H. M. Ware* 921

Generation of monoclonal antibodies to a human natural killer clone. Characterization of two natural killer-associated antigens, $NKH1_A$ and NKH2, expressed on subsets of large granular lymphocytes. *T. Hercend, J. D. Griffin, A. Bensussan, R. E. Schmidt, M. A. Edson, A. Brennan, C. Murray, J. F. Daley, S. F. Schlossman, and J. Ritz* 932

Mucin degradation in human colon ecosystems. Isolation and properties of fecal strains that degrade ABH blood group antigens and oligosaccharides from mucin glycoproteins. *L. C. Hoskins, M. Agustines, W. B. McKee, E. T. Boulding, M. Kriaris, and G. Niedermeyer* 944

Vitamin D-dependent rickets type II. Defective induction of 25-hydroxyvitamin D_3-24-hydroxylase by 1,25-dihydroxyvitamin D_3 in cultured skin fibroblasts. *G. T. Gamblin, U. A. Liberman, C. Eil, R. W. Downs, Jr., D. A. DeGrange, and S. J. Marx* 954

Long-term marrow culture of cells from patients with acute myelogenous leukemia. Selection in favor of normal phenotypes in some but not all cases. *L. Coulombel, C. Eaves, D. Kalousek, C. Gupta, and A. Eaves* 961

Inhibition of collagen deposition in the extracellular matrix prevents the establishment of a stroma supportive of hematopoiesis in long-term murine bone marrow cultures. *K. S. Zuckerman, R. K. Rhodes, D. D. Goodrum, V. R. Patel, B. Sparks, J. Wells, M. S. Wicha, and L. A. Mayo* 970

Effects of chronic ethanol intake on mobilization and excretion of cholesterol in baboons. *C. Karsenty, E. Baraona, M. J. Savolainen, and C. S. Lieber* 976

Human thrombomodulin is not an efficient inhibitor of the procoagulant activity of thrombin. *I. Maruyama, H. H. Salem, H. Ishii, and P. W. Majerus* 987

Effects of endogenously produced leukotrienes, thromboxane, and prostaglandins on coronary vascular resistance in rabbit myocardial infarction. *A. S. Evers, S. Murphree, J. E. Saffitz, B. A. Jakschik, and P. Needleman* 992

Cigarette smoke can activate the alternative pathway of complement in vitro by modifying the third component of complement. *R. R. Kew, B. Ghebrehiwet, and A. Janoff* 1000

Formation of methotrexate polyglutamates in purified myeloid precursor cells from normal human bone marrow. *S. Koizumi, G. A. Curt, R. L. Fine, J. D. Griffin, and B. A. Chabner* 1008

Gelsolin, a Ca^{2+}-dependent actin-binding protein in a hamster insulin-secreting cell line. *T. Y. Nelson and A. E. Boyd III* 1015

A soluble suppressor T cell factor protects against experimental intraabdominal abscesses. *D. F. Zaleznik, R. W. Finberg, M. E. Shapiro, A. B. Onderdonk, and D. L. Kasper* 1023

Receptors and growth-promoting effects of insulin and insulinlike growth factors on cells from bovine retinal capillaries and aorta. *G. L. King, A. D. Goodman, S. Buzney, A. Moses, and C. R. Kahn* 1028

Role of parathyroid hormone in the glucose intolerance of chronic renal failure. *M. Akmal, S. G. Massry, D. A. Goldstein, P. Fanti, A. Weisz, and R. A. DeFronzo* . . . 1037

Dietary and hormonal regulation of aldolase B gene expression. *A. Munnich, C. Besmond, S. Darquy, G. Reach, S. Vaulont, J.-C. Dreyfus, and A. Kahn* 1045

Scl-86, a marker antigen for diffuse scleroderma. *W. J. van Venrooij, S. O. Stapel, H. Houben, W. J. Habets, C. G. M. Kallenberg, E. Penner, and L. B. van de Putte* 1053

Role of transferrin, Fe, and transferrin receptors in myeloid leukemia cell growth. Studies with an antitransferrin receptor monoclonal antibody. *R. Taetle, K. Rhyner, J. Castagnola, D. To, and J. Mendelsohn* 1061

Identification, isolation, and partial characterization of a fatty acid binding protein from rat jejunal microvillous membranes. *W. Stremmel, G. Lotz, G. Strohmeyer, and P. D. Berk* 1068

Rapid Publications

Elevated epidermal growth factor receptor gene copy number and expression in a squamous carcinoma cell line. *G. T. Merlino, Y. Xu, N. Richert, A. J. L. Clark, S. Ishii, S. Banks-Schlegel, and I. Pastan* 1077

T cells and probably B cells arise from the malignant clone in chronic myelogenous leukemia. *A. A. Fauser, L. Kanz, K. J. Bross, and G. W. Löhr* 1080

Epidermal growth factor, a vascular smooth muscle mitogen, induces rat aortic contraction. *B. C. Berk, T. A. Brock, R. C. Webb, M. B. Taubman, W. J. Atkinson, M. A. Gimbrone, Jr., and R. W. Alexander* 1083

Calcium transport in canine renal basolateral membrane vesicles. Effects of parathyroid hormone. *J. E. Scoble, S. Mills, and K. A. Hruska* 1096

Relationship between insulin-mediated glucose disposal and lipid metabolism in man. *S. Lillioja, C. Bogardus, D. M. Mott, A. L. Kennedy, W. C. Knowler, and B. V. Howard* 1106

Validation of the difference in urine and blood carbon dioxide tension during bicarbonate loading as an index of distal nephron acidification in experimental models of distal renal tubular acidosis. *T. D. DuBose, Jr., and C. R. Caflisch* 1116

Plasma and muscle free carnitine deficiency due to renal Fanconi syndrome. *I. Bernardini, W. B. Rizzo, M. Dalakas, J. Bernar, and W. A. Gahl* 1124

Kinetics of rubidium-82 after coronary occlusion and reperfusion. Assessment of patency and viability in open-chested dogs. *R. A. Goldstein* 1131

Homology of the NH_2-terminal amino acid sequences of the heavy and light chains of human monoclonal lupus autoantibodies containing the dominant 16/6 idiotype. *P. M. Atkinson, G. W. Lampman, B. C. Furie, Y. Naparstek, R. S. Schwartz, B. D. Stollar, and B. Furie* 1138

Cholecystokinin bioactivity in human plasma. Molecular forms, responses to feeding, and relationship to gallbladder contraction. *R. A. Liddle, I. D. Goldfine, M. S. Rosen, R. A. Taplitz, and J. A. Williams* 1144

Characterization of the adhesion of the human monocytic cell line U937 to cultured endothelial cells. *P. E. DiCorleto and C. A. de la Motte* 1153

In vitro cytotoxicity and transplantation protection by autologous natural and activated killer cells against an in vitro transformed tumorigenic fibroblast line. A case study. *S. A. Wilhelm and B. Mukherji* 1162

Antithrombotic properties in rabbits of heparin and heparin fragments covalently coupled to human antithrombin III. *C. Mattsson, M. Hoylaerts, E. Holmer, T. Uthne, and D. Collen* 1169

Purification and partial characterization of a megakaryocyte colony-stimulating factor from human plasma. *R. Hoffman, H. H. Yang, E. Bruno, and J. E. Straneva* 1174

Platelet antibodies of the IgM class in immune thrombocytopenic purpura. *D. B. Cines, S. B. Wilson, A. Tomaski, and A. D. Schreiber* 1183

Bone and parathyroid inhibitory effects of *S*-2(3-aminopropylamino)ethylphosphorothioic acid. Studies in experimental animals and cultured bone cells. *M. F. Attie, M. D. Fallon, B. Spar, J. S. Wolf, E. Slatopolsky, and S. Goldfarb* 1191

Interaction of asialo von Willebrand factor with glycoprotein Ib induces fibrinogen binding to the glycoprotein IIb/IIIa complex and mediates platelet aggregation. *L. De Marco, A. Girolami, S. Russell, and Z. M. Ruggeri* 1198

Regulation of myocardial amino acid balance in the conscious dog. *R. G. Schwartz, E. J. Barrett, C. K. Francis, R. Jacob, and B. L. Zaret* 1204

Transport of urokinase across the intestinal tract of normal human subjects with stimulation of synthesis and/or release of urokinase-type proteins. *N. Toki, H. Sumi, K. Sasaki, I. Boreisha, and K. C. Robbins* 1212

Stimulation of the proliferation of human bone cells in vitro by human monocyte products with interleukin-1 activity. *M. Gowen, D. D. Wood, and R. G. G. Russell* 1223

Isolation and partial characterization of a human alveolar macrophage-derived neutrophil-activating factor. *J. E. Pennington, T. H. Rossing, L. W. Boerth, and T. H. Lee* 1230

Decreased serum triiodothyronine in starving rats is due primarily to diminished thyroidal secretion of thyroxine. *W. B. Kinlaw, H. L. Schwartz, and J. H. Oppenheimer* 1238

Functional role of thromboxane production by acutely rejecting renal allografts in rats. *T. M. Coffman, W. E. Yarger, and P. E. Klotman* 1242

Effects of cysteamine and antibody to somatostatin on islet cell function in vitro. Evidence that intracellular somatostatin deficiency augments insulin and glucagon secretion. *Y. C. Patel, I. Pierzchala, M. Amherdt, and L. Orci* 1249

Evidence for carrier-mediated chloride/bicarbonate exchange in canalicular rat liver plasma membrane vesicles. *P. J. Meier, R. Knickelbein, R. H. Moseley, J. W. Dobbins, and J. L. Boyer* 1256

Evidence for reduced thermic effect of insulin and glucose infusions in Pima Indians. *C. Bogardus, S. Lillioja, D. Mott, J. Zawadzki, A. Young, and W. Abbott* 1264

Subclass restriction and polyclonality of the systemic lupus erythematosus marker antibody anti-Sm. *R. A. Eisenberg, K. Dyer, S. Y. Craven, C. R. Fuller, and W. J. Yount* 1270

Identification of three accessory cell populations in human bone marrow with erythroid burst-promoting properties. *D. C. Linch, J. M. Lipton, and D. G. Nathan* 1278

Correction of abnormal renal blood flow response to angiotensin II by converting enzyme inhibition in essential hypertensives. *J. Redgrave, S. Rabinowe, N. K. Hollenberg, and G. H. Williams* 1285

Reduced affinity of the androgen receptor for 5α-dihydrotestosterone but not methyltrienolone in a form of partial androgen resistance. Studies on cultured genital skin fibroblasts. *L. Pinsky, M. Kaufman, and A. E. Chudley* 1291

Role of granulocyte oxygen products in damage of *Schistosoma mansoni* eggs in vitro. *J. W. Kazura, P. de Brito, J. Rabbege, and M. Aikawa* 1297

Evidence that cell surface heparan sulfate is involved in the high affinity thrombin binding to cultured porcine aortic endothelial cells. *K. Shimada and T. Ozawa* . . . 1308

Effects of adrenalectomy and chronic adrenal corticosteroid replacement on potassium transport in rat kidney. *B. Stanton, G. Giebisch, G. Klein-Robbenhaar, J. Wade, and R. A. DeFronzo* 1317

Ultrastructure of rat initial collecting tubule. Effect of adrenal corticosteroid treatment. *B. Stanton, A. Janzen, G. Klein-Robbenhaar, R. DeFronzo, G. Giebisch, and J. Wade* 1327

Origin of urinary nonconjugated 19-nor-deoxycorticosterone and metabolism of infused radiolabeled 19-nor-deoxycorticosterone in men and women. *M. L. Casey, A. Guerami, L. Milewich, C. E. Gomez-Sanchez, and P. C. MacDonald* 1335

Regulation of human B cell activation by prostaglandin E_2. Suppression of the generation of immunoglobulin-secreting cells. *D. F. Jelinek, P. A. Thompson, and P. E. Lipsky* 1339

Affinity-labeled plasma somatomedin-C/insulinlike growth factor I binding proteins. Evidence of growth hormone dependence and subunit structure. *J. R. Wilkins and A. J. D'Ercole* 1350

Determination of the hemoglobin F program in human progenitor-derived erythroid cells. *A. D. Friedman, D. C. Linch, B. Miller, J. M. Lipton, J. Javid, and D. G. Nathan* 1359

In vivo interaction of antibodies with cell surface antigens. A mechanism responsible for in situ formation of immune deposits in the zona pellucida of rabbit oocytes. *S. Matsuo, P. R. B. Caldwell, J. R. Brentjens, and G. Andres* 1369

Human platelet-derived growth factor stimulates prostaglandin synthesis by activation and by rapid *de novo* synthesis of cyclooxygenase. *A. J. R. Habenicht, M. Goerig, J. Grulich, D. Rothe, R. Gronwald, U. Loth, G. Schettler, B. Kommerell, and R. Ross* 1381

Rapid Publication

Evidence for the involvement of B lymphoid cells in polycythemia vera and essential thrombocythemia. *W. H. Raskind, R. Jacobson, S. Murphy, J. W. Adamson, and P. J. Fialkow* 1388

Relationship of urinary and blood carbon dioxide tension during hypercapnia in the rat. Its significance in the evaluation of collecting duct hydrogen ion secretion. *D. C. Batlle, M. Downer, C. Gutterman, and N. A. Kurtzman* 1517

Abnormal redox status of membrane-protein thiols in sickle erythrocytes. *B. H. Rank, J. Carlsson, and R. P. Hebbel* 1531

Partial restoration of impaired interleukin-2 production and Tac antigen (putative interleukin-2 receptor) expression in patients with acquired immune deficiency syndrome by isoprinosine treatment in vitro. *K. Y. Tsang, H. H. Fudenberg, G. M. P. Galbraith, R. P. Donnelly, L. R. Bishop, and W. R. Koopmann* 1538

Modulation of procollagen gene expression by retinoids. Inhibition of collagen production by retinoic acid accompanied by reduced type I procollagen messenger ribonucleic acid levels in human skin fibroblast cultures. *H. Oikarinen, A. I. Oikarinen, E. M. L. Tan, R. P. Abergel, C. A. Meeker, M.-L. Chu, D. J. Prockop, and J. Uitto* 1545

Nifedipine increases cholesteryl ester hydrolytic activity in lipid-laden rabbit arterial smooth muscle cells. A possible mechanism for its antiatherogenic effect. *O. R. Etingin and D. P. Hajjar* 1554

An evaluation of the significance of microscopic colitis in patients with chronic diarrhea. *G. W. Bo-Linn, D. D. Vendrell, E. Lee, and J. S. Fordtran* 1559

Recognition and characterization of stage-specific oocyst/sporozoite antigens of *Toxoplasma gondii* by human antisera. *L. H. Kasper and P. L. Ware* 1570

Pharmacologic effects of autacoids on subsets of T cells. Regulation of expression/function of histamine-2 receptors by a subset of suppressor cells. *M. M. Khan, P. Sansoni, E. G. Engleman, and K. L. Melmon* 1578

Pulsatile growth hormone secretion in normal man during a continuous 24-hour infusion of human growth hormone releasing factor (1-40). Evidence for intermittent somatostatin secretion. *M. L. Vance, D. L. Kaiser, W. S. Evans, R. Furlanetto, W. Vale, J. Rivier, and M. O. Thorner* 1584

Effects of platelet-modifying drugs on arterial thromboembolism in baboons. Aspirin potentiates the antithrombotic actions of dipyridamole and sulfinpyrazone by mechanism(s) independent of platelet cyclooxygenase inhibition. *S. R. Hanson, L. A. Harker, and T. D. Bjornsson* 1591

(−)-Adrenaline-induced, calcium-dependent phosphorylation of proteins in human platelets. *L. H. Block, H. Jaksche, P. Erne, P. Bolli, and F. R. Bühler* 1600

Regulation of cation content and cell volume in hemoglobin erythrocytes from patients with homozygous hemoglobin C disease. *C. Brugnara, A. S. Kopin, H. F. Bunn, and D. C. Tosteson* 1608

Generation of free radical intermediates from foreign compounds by neutrophil-derived oxidants. *B. Kalyanaraman and P. G. Sohnle* 1618

Role of hepatic autoregulation in defense against hypoglycemia in humans. *G. Bolli, P. De Feo, G. Perriello, S. De Cosmo, M. Ventura, P. Campbell, P. Brunetti, and J. E. Gerich* 1623

Alpha thalassemia changes erythrocyte heterogeneity in sickle cell disease. *C. T. Noguchi, G. J. Dover, G. P. Rodgers, G. R. Serjeant, S. E. Antonarakis, N. P. Anagnou, D. R. Higgs, D. J. Weatherall, and A. N. Schechter* 1632

Carbon dioxide causes exocytosis of vesicles containing H^+ pumps in isolated perfused proximal and collecting tubules. *G. J. Schwartz and Q. Al-Awqati* 1638

Characterization of antigens from nontypable *Haemophilus influenzae* recognized by human bactericidal antibodies. Role of *Haemophilus* outer membrane proteins. *H. E. Gnehm, S. I. Pelton, S. Gulati, and P. A. Rice* 1645

Mechanism of insulin resistance in human liver cirrhosis. Evidence of a combined receptor and postreceptor defect. *P. Cavallo-Perin, M. Cassader, C. Bozzo, A. Bruno, P. Nuccio, A. M. Dall'Omo, M. Marucci, and G. Pagano* 1659

Diarrhea in streptozocin-treated rats. Loss of adrenergic regulation of intestinal fluid and electrolyte transport. *E. B. Chang, R. M. Bergenstal, and M. Field* 1666

Use of a murine monoclonal antibody for detection of circulating plasma DF3 antigen levels in breast cancer patients. *D. F. Hayes, H. Sekine, T. Ohno, M. Abe, K. Keefe, and D. W. Kufe* 1671

Histamine modulates contraction and cyclic nucleotides in cultured rat mesangial cells. Differential effects mediated by histamine H_1 and H_2 receptors. *J. R. Sedor and H. E. Abboud* 1679

Use of SM-1 monoclonal antibody and human complement in selective killing of small cell carcinoma of the lung. *M. Mabry, J. A. Speak, J. D. Griffin, R. A. Stahel, and S. D. Bernal* 1690

Arginine vasotocin in ovine fetal blood, urine, and amniotic fluid. *M. G. Ervin, R. D. Leake, M. G. Ross, G. C. Calvario, and D. A. Fisher* 1696

Mechanism of action of gemfibrozil on lipoprotein metabolism. *K. Saku, P. S. Gartside, B. A. Hynd, and M. L. Kashyap* 1702

Abnormality of phospholipid transverse diffusion in sickle erythrocytes. *A. Zachowski, C. T. Craescu, F. Galacteros, and P. F. Devaux* 1713

Immunization with a plasmodium falciparum merozoite surface antigen induces a partial immunity in monkeys. *L. H. Perrin, B. Merkli, M. S. Gabra, J. W. Stocker, C. Chizzolini, and R. Richle* 1718

Cross-reactive idiotypes in immunoglobulin A-deficient sera. *M. K. L. Cheung, C. Cunningham-Rundles, and J. Koistinen* 1722

Bovine milk lipoprotein lipase transfers tocopherol to human fibroblasts during triglyceride hydrolysis in vitro. *M. G. Traber, T. Olivecrona, and H. J. Kayden* 1729

Rapid Publications

Activation of the respiratory burst enzyme from human neutrophils in a cell-free system. Evidence for a soluble cofactor. *L. C. McPhail, P. S. Shirley, C. C. Clayton, and R. Snyderman* 1735

Activation of human neutrophil nicotinamide adenine dinucleotide phosphate, reduced (triphosphopyridine nucleotide, reduced) oxidase by arachidonic acid in a cell-free system. *J. T. Curnutte* 1740

June 1985, Volume 75, Number 6

Perspectives

Role of calcium and phosphoinositides in the actions of certain hormones and neurotransmitters. *J. H. Exton* 1753

Regular Articles

Regulation of alpha$_1$ proteinase inhibitor function by rabbit alveolar macrophages. Evidence for proteolytic rather than oxidative inactivation. *M. J. Banda, E. J. Clark, and Z. Werb* 1758

Familial gynecomastia with increased extraglandular aromatization of plasma carbon$_{19}$-steroids. *G. D. Berkovitz, A. Guerami, T. R. Brown, P. C. MacDonald, and C. J. Migeon* 1763

Release of arachidonate from membrane phospholipids in cultured neonatal rat myocardial cells during adenosine triphosphate depletion. Correlation with the progression of cell injury. *K. R. Chien, A. Sen, R. Reynolds, A. Chang, Y. Kim, M. D. Gunn, L. M. Buja, and J. T. Willerson* 1770

Continuous administration of synthetic ovine corticotropin-releasing factor in man. Physiological and pathophysiological implications. *H. M. Schulte, G. P. Chrousos, P. W. Gold, J. D. Booth, E. H. Oldfield, G. B. Cutler, Jr., and D. L. Loriaux* 1781

A circulating inhibitor of fluid-phase amplification. C3 convertase formation in systemic lupus erythematosus. *F. B. Waldo, J. Forristal, L. Beischel, and C. D. West* 1786

Defective metabolism of hypertriglyceridemic low density lipoprotein in cultured human skin fibroblasts. Normalization with bezafibrate therapy. *Y. Kleinman, S. Eisenberg, Y. Oschry, D. Gavish, O. Stein, and I. Stein* 1796

Characterization of high density lipoprotein binding to human adipocyte plasma membranes. *B. S. Fong, P. O. Rodrigues, A. M. Salter, B. P. Yip, J.-P. Despres, A. Angel, and R. E. Gregg* 1804

Race and sex differences in erythrocyte Na^+, K^+, and Na^+-K^+-adenosine triphosphatase. *N. Lasker, L. Hopp, S. Grossman, R. Bamforth, and A. Aviv* 1813

Antibody-mediated killing of suppressor T lymphocytes as a possible cause of macroglobulinemia in the tropical splenomegaly syndrome. *W. F. Piessens, S. L. Hoffman, A. A. Wadee, P. W. Piessens, S. Ratiwayanto, L. Kurniawan, J. R. Campbell, H. A. Marwoto, and L. L. Laughlin* 1821

Deficiency of the autologous mixed lymphocyte reaction in patients with classic hemophilia treated with commercial Factor VIII concentrate. Correlation with T cell subset distribution, antibodies to lymphadenopathy-associated or human T lymphotropic virus, and analysis of the cellular basis of the deficiency. *J. S. Smolen, P. Bettelheim, U. Köller, S. Mc Dougal, W. Graninger, T. A. Luger, W. Knapp, and K. Lechner* 1828

Effects of antioxidants on oxidant-induced sister chromatid exchange formation. *A. B. Weitberg, S. A. Weitzman, E. P. Clark, and T. P. Stossel* 1835

Enhanced glycemic responsiveness to epinephrine in insulin-dependent diabetes mellitus is the result of the inability to secrete insulin. Augmented insulin secretion normally limits the glycemic, but not the lipolytic or ketogenic, response to epinephrine in humans. *M. A. Berk, W. E. Clutter, D. Skor, S. D. Shah, R. P. Gingerich, C. A. Parvin, and P. E. Cryer* 1842

Despite a massive increase in cortisol secretion in women during parturition, there is an equally massive increase in prostaglandin synthesis. A paradox? *M. L. Casey, P. C. MacDonald, and M. D. Mitchell* 1852

Healing of bone disease in X-linked hypophosphatemic rickets/osteomalacia. Induction and maintenance with phosphorus and calcitriol. *R. M. Harrell, K. W. Lyles, J. M. Harrelson, N. E. Friedman, and M. K. Drezner* 1858

Pathogenesis of nephrogenic diabetes insipidus due to chronic administration of lithium in rats. *S. Christensen, E. Kusano, A. N. K. Yusufi, N. Murayama, and T. P. Dousa* 1869

Characterization of precursor and secreted forms of human angiotensinogen. *D. J. Campbell, J. Bouhnik, E. Coezy, J. Menard, and P. Corvol* 1880

Influence of naloxone on the total capacitance vasculature of the dog. *L. Bell, E. Maratea, and D. L. Rutlen* 1894

Passive transfer of diabetes from BB/W to Wistar-Furth rats. *S. B. Koevary, D. E. Williams, R. M. Williams, and W. L. Chick* 1904

Low doses of interferon alpha result in more effective clinical natural killer cell activation. *B. S. Edwards, J. A. Merritt, R. C. Fuhlbrigge, and E. C. Borden* 1908

Evidence for a functional role of endogenously produced somatomedinlike peptides in the regulation of DNA synthesis in cultured human fibroblasts and porcine smooth muscle cells. *D. R. Clemmons and J. J. Van Wyk* 1914

Erythrocyte membrane rigidity induced by glycophorin A-ligand interaction. Evidence for a ligand-induced association between glycophorin A and skeletal proteins. *J. A. Chasis, N. Mohandas, and S. B. Shohet* 1919

Fuel-mediated teratogenesis. Use of D-mannose to modify organogenesis in the rat embryo in vivo. *T. Buchanan, N. Freinkel, N. J. Lewis, B. E. Metzger, and S. Akazawa* 1927

Correlation between G2m(n) immunoglobulin allotype and human antibody response and susceptibility to polysaccharide encapsulated bacteria. *D. M. Ambrosino, G. Schiffman, E. C. Gotschlich, P. H. Schur, G. A. Rosenberg, G. G. DeLange, E. van Loghem, and G. R. Siber* 1935

Primate mammary development. Effects of hypophysectomy, prolactin inhibition, and growth hormone administration. *D. L. Kleinberg, W. Niermann, E. Flamm, P. Cooper, G. Babitsky, and Q. Valersi* 1943

Electron microprobe analysis of human labial gland secretory granules in cystic fibrosis. *K. Izutsu, D. Johnson, M. Schubert, E. Wang, B. Ramsey, A. Tamarin, E. Truelove, W. Ensign, and M. Young* 1951

Sera from patients with the acquired immunodeficiency syndrome inhibit production of interleukin-2 by normal lymphocytes. *J. P. Siegel, J. Y. Djeu, N. I. Stocks, H. Masur, E. P. Gelmann, and G. V. Quinnan, Jr.* 1957

Increased adherence of sickled and phosphatidylserine-enriched human erythrocytes to cultured human peripheral blood monocytes. *R. S. Schwartz, Y. Tanaka, I. J. Fidler, D. T.-Y. Chiu, B. Lubin, and A. J. Schroit* 1965

Fat cell metabolism in different regions in women. Effect of menstrual cycle, pregnancy, and lactation. *M. Rebuffé-Scrive, L. Enk, N. Crona, P. Lönnroth, L. Abrahamsson, U. Smith, and P. Björntorp* 1973

A human T cell lymphoma secreting an immunoglobulin E specific helper factor. *M. C. Young, H. Harfi, R. Sabbah, D. Y. M. Leung, and R. S. Geha* 1977

Administration of atrial natriuretic factor inhibits sodium-coupled transport in proximal tubules. *T. G. Hammond, A. N. K. Yusufi, F. G. Knox, and T. P. Dousa* 1983

Adoptive transfer of suppression of arthritis in the mouse model of collagen-induced arthritis. Evidence for a type II collagen-specific suppressor T cell. *T. F. Kresina and R. W. Moskowitz* 1990

Influence of cell cycle phase-specific agents on simian fetal hemoglobin synthesis. *N. L. Letvin, D. C. Linch, G. P. Beardsley, K. W. McIntyre, B. A. Miller, and D. G. Nathan* 1999

Metabolism of heptadecapeptide gastrin in humans studied by region-specific antisera. *S. Pauwels, G. J. Dockray, R. Walker, and S. Marcus* 2006

Abnormal sodium transport in synaptosomes from brain of uremic rats. *C. L. Fraser, P. Sarnacki, and A. I. Arieff* 2014

Abnormal function of B lymphocytes from peripheral blood of multiple myeloma patients. Lack of correlation between the number of cells potentially able to secrete immunoglobulin M and serum immunoglobulin M levels. *L. M. Pilarski, B. A. Ruether, and M. J. Mant* 2024

Human alveolar macrophages synthesize Factor VII in vitro. Possible role in interstitial lung disease. *H. A. Chapman, Jr., C. L. Allen, O. L. Stone, and D. S. Fair* 2030

Sympathetic modulation of biochemical and physiological response to immune degranulation in canine bronchial airways in vivo. *E. R. Garrity, N. P. Stimler, N. M. Munoz, J. Tallet, A. C. David, and A. R. Leff* 2038

Modulation of proinsulin messenger RNA after partial pancreatectomy in rats. Relationships to glucose homeostasis. *M. J. Orland, R. Chyn, and M. A. Permutt* 2047

Cyclic adenosine monophosphate-stimulated bicarbonate secretion in rabbit cortical collecting tubules. *V. L. Schuster* 2056

Platelet thrombospondin forms a trimolecular complex with plasminogen and histidine-rich glycoprotein. *R. L. Silverstein, L. L. K. Leung, P. C. Harpel, and R. L. Nachman* 2065

Characterization of the complement sensitivity of paroxysmal nocturnal hemoglobinuria erythrocytes. *C. J. Parker, T. Wiedmer, P. J. Sims, and W. F. Rosse* 2074

Rapid Publications

Extracellular matrix promotes the growth and differentiation of murine hematopoietic cells in vitro. *A. Campbell, M. S. Wicha, and M. Long* 2085

Prevention of autoantibody formation and prolonged survival in New Zealand Black/New Zealand White F_1 mice fed dehydroisoandrosterone. *J. A. Lucas, S. A. Ahmed, M. L. Casey, and P. C. MacDonald* 2091
